Title : Oracle Inventory Cloud 2019
Implementation Essentials

Vendor : Oracle

Version : DEMO

NO.1 Your organization is planning for a periodic counting of individual items automatically throughout the course of the year. As part of this activity, the user has loaded items to the cycle count but some of the items are not being considered when count schedules and count sequences are not generated.

Identify two reasons that explain why the items are not being considered.

- A. The approval controls are not set up.
- B. The Include in Schedule option is not selected to include the item for auto-scheduling.
- C. The Cycle Count Enabled flag is not selected for the inventory organization.
- D. The Cycle Count Enabled flag is not selected for the item.
- E. The ABC assignment group is not defined.

Answer: A,D

NO.2 Which action invokes supply chain orchestration and transfer of data to supply chain orchestration interface tables?

- A. running Min-Max Planning
- B. creating Purchase Order Receipt
- C. creating a new Inventory Organization for execution of supply chain orchestration
- D. running a scheduled process called "Create Transactions"

Answer: A

NO.3 Your customer has a requirement across their 10 warehouses, each with different users. They would like that whenever a warehouse user logs in, their default warehouse should get populated. How will you achieve this?

- A. Set the profile option INV_DEFAULT_ORG_ID at site level.
- B. Set the profile option INV_DEFAULT_WHSE_ID at site level.
- C. Set the profile option INV_DEFAULT_ORG_ID at role level for each role (different roles for different warehouses).
- D. Set the profile option INV_DEFAULT_WHSE_ID at role level (different roles for different warehouses).
- E. Set the profile option INV_DEFAULT_WHSE_ID at user level for each user.
- F. Set the profile option INV_DEFAULT_ORG_ID at user level for each user.

Answer: C

NO.4 Your customer wants to prevent customer shipments out of a specific subinventory. They are setting up a material status to control this.

Which transaction do they need to disallow?

- A. Move Request Putaway
- B. Miscellaneous Issue
- C. Ship Confirm
- D. Sales Order Pick
- E. Sales Order Issue

Answer: E

NO.5 In the Back-to-Back (B2B) Order to Cash flow, ordered items are purchased from a supplier. The Sourcing Rules have been defined for the item and the buy flow has been initiated. The sales order line is shown as Awaiting Shipping and the supply line status is "In Purchasing" with the supply order generated but the purchase requisition not generating.

What is the reason?

- A. Supply order is generated with exceptions.
- B. The sourcing rule is incorrect.
- C. Buy requests originate from Order Management.
- D. Preparer is not valid.
- E. No Blanket Purchase Agreement (BPA) exists for this supplier-item combination.

Answer: B

NO.6 Your customer is setting up serial control. The requirement is that if item A has serial 123, then they do not want item B to also have serial 123 within the same inventory organization.

Which serial control setting must be used to meet this requirement?

- A. Unique within organization
- B. Unique across organizations
- C. Unique within Item and organization
- D. Unique within items
- E. Unique across Enterprise

Answer: A

NO.7 Your customer decides to implement Cloud Procurement and Inventory. While discussing with your customer, you come to know that they have a business that spans across multiple locations and they have warehouses situated across USA and Canada.

* All their procurement, payables, and distribution activities take place from USA.

* They have a central warehouse in USA and after the goods are delivered to this warehouse, they are distributed across multiple additional warehouses. The warehouses are managed separately from the requisitioning units.

* For requesting material they have two units. One located in USA that monitors the current stock. They are responsible for creating requisition for any material shortage in USA. They have another location in Canada for requesting material.

Which setup fulfills this scenario?

A

- BU1: USA - as procurement business unit (BU)
- BU2: Canada - as requisitioning business unit
- BU3: USA - as requisitioning business unit
- Define Service provider relationship where Canada procurement business unit serves as procurement and payables service provider for only Canada requisitioning Business Unit

B

- BU1: USA - as procurement business unit (BU)
- BU2: Canada - as requisitioning business unit
- BU3: USA - as requisitioning business unit
- Define Service provider relationship where USA procurement business unit serves as procurement and payables service provider for only Canada requisitioning Business Unit

C

- BU1: USA - as procurement and requisitioning Business Unit (BU)
- BU2: Canada - as requisitioning Business Unit
- Define Service provider relationship where Canada procurement business unit serves as procurement and payables service provider for Canada Requisitioning Business Unit

D

- BU1: USA - as procurement business unit (BU)
- BU2: Canada - as requisitioning business unit
- BU3: USA - as requisitioning business unit
- Define Service provider relationship where USA procurement business unit serves as procurement and payables service provider for both Canada and USA requisitioning Business Units

A. Option A

B. Option C

C. Option B

D. Option D

Answer: B

NO.8 During Cloud Inventory implementation your customer requires you to enable the Oracle Transactional Business Intelligence (OTBI) KPI to review the list of standard reports which is useful for their current business scenario. When navigating to reports and analytics, the warehouse dashboard doesn't show any KPI watchlist.

Identify two causes.

A. Data permissions for the organization being referenced are not set up.

B. Organization is not enabled for warehousing.

C. Logistics Business Intelligence Analytics is not implemented.

D. Logistics Business Intelligence Analytics is enabled.

E. Supply Chain and Order Management Business Intelligence Analytics is not enabled.

Answer: C,E
