Exam : **H13-311-ENU**

Title : HCIA-AI (Huawei Certified ICT Associate-Artificial Intelligence)

Vendor : Huawei

Version : DEMO

NO.1 The number of rows and columns of the three matrices A, B, and C is 3 rows and 2 columns, 2 rows, 3 columns, 3 rows and 3 columns, which of the following operations is meaningful?

- A. AC
- B. AB-BC
- C. BC
- D. A+B

Answer: C

NO.2 Only matrix A and matrix B have the same number of rows and columns, A and B can be added

- A. False
- B. True

Answer: B

NO.3 The history of robots is not long. In 1959, the United States, Engelberg and Devol made the world's first generation of industrial robots, and the history of robots really began.

According to the development process of the robot, it is usually divided into three generations, respectively are: (Multiple Choice)

- A. Robots that will think
- B. Intelligent robot
- C. Robot with sensation
- D. Teaching Reproduction Robot

Answer: B,C,D

NO.4 A scalar k is multiplied by matrix A equal to k and each of the numbers in A is multiplied.

- A. True
- B. False

Answer: A

NO.5 Which of the following options is not central to linear algebra?

- A. Linear transformation
- B. Probability theory
- C. Vector space
- D. Matrix theory

Answer: B

NO.6 The determinant of square matrix A is a scalar.

- A. False
- B. True

Answer: B

NO.7 Under the large-scale relationship analysis scenario, which of the following options does not belong to the three high demands of massive relationship processing?

- A. High scalability and high availability requirements for relational analysis platforms
- B. Efficient relationship discovery data for massive data
- C. Efficient storage and access requirements for massive amounts of data
- D. Efficient sharing of massive data

Answer: D

NO.8 Which of the following options is not a reason for traditional machine learning algorithms to promote the development of deep learning?

- A. Local invariance and smooth regularization
- B. Feature Engineering
- C. Dimensional disaster
- D. Manifold learning

Answer: B

NO.9 Which of the following statements about Python are correct? (Multiple choice)

- A. Python is purely free software and the source code follows the GPL (GNU General Public License) protocol.
- B. Invented in 1989 by the Dutch Guido van Rossum, the first public release was issued in 1991.
- C. Python is often nicknamed glue language, which can easily connect various modules made in other languages.
- D. Python syntax is simple and clean. One of the features is to force blank characters to be used as statement indentation.

Answer: A,B,C,D

NO.10 What is the English abbreviation for AI?

- A. Artificial Intelligence
- B. Automatic Information
- C. Automatic Intelligence
- D. Artificial Information

Answer: A

NO.11 The continue statement in the Python language is used to jump out of this loop and then continue to execute the next round of statements.

- A. False
- B. True

Answer: B

NO.12 In what year did Huawei officially provide services in the form of cloud services, and combined with more partners to provide richer artificial intelligence practices?

- A. 2017
- B. 2015
- C. 2002
- D. 2013

Answer: A

NO.13 As the following, what are the Python language design philosophy? (Multiple Choice)

- A. Expensive
- B. Simple
- C. Explicit
- D. Beautiful

Answer: B,C,D

NO.14 The trace operation returns the sum of the diagonal elements of the matrix. Therefore, the trace of matrix A and its transposed matrix are equal.

- A. True
- B. False

Answer: A

NO.15 Which of the following is not a way for the TensorFlow program to read data?

- A. Feeding data
- B. Preload data
- C. Read from the file
- D. Write a file format reader

Answer: D

NO.16 Which of the following files is the graph structure of TensorFlow saved in?

- A. .cpkt file
- B. .meta file
- C. index file
- D. checkpoint file

Answer: B
